Re: Farneman Development

Thank you for wanting to choose Columbia Gas of Ohio, Inc. (COH), a NiSource Company, to serve your natural gas needs to your new proposed project. This letter is to confirm COH does **not** have facilities along Concord Rd or Dublin Rd for Farneman Development. The closest main line is near the intersection of Dublin Rd and Duffy Rd. Although COH facilities may be in the vicinity of your proposed property, further investigation will need to take place for capacity. Once Attachment A of the Information Request Packet has been answered and returned and all other requested information is released to the COH New Business Team, gas availability and any capacity issues will be determined; as well as any deposit and/or Aid-To-Construction costs that may be required.

Please note that availability is contingent upon a cost benefit analysis. If the project is not deemed economically feasible for Columbia Gas, a deposit may be necessary

If you have any questions regarding availability, or how it is determined, please feel free to contact me at 614-623-2644 Monday-Friday, 8:00am to 4:00pm. Columbia Gas and I look forward to partnering with you on this and future projects.

Sincerely,

Donyel Gibson
